

Our Energy, Our Future™
A Dialogue With America

Increasing demand

Rising rates

CO2 reductions

Transmission overload

If Americans want to keep electricity safe, reliable and affordable, Congress and America's electric cooperatives must work together.

Cape Hatteras Electric Cooperative is one of over 900 private, consumer-owned electric cooperatives that provide electric service to more than 42 million people in 47 states. Our Energy, Our Future is a grassroots effort to give electric cooperative consumers a unified voice. Yes, you can make a difference! Join the 501,000 American consumers who have asked their elected officials tough questions about our energy future.
